Statistics fresh graduate with hands-on experience across the analytics pipeline, from data collection, verification, and cleaning to SQL-based analysis, statistical modeling, and dashboard automation using Python, R, SQL, and Tableau, with projects spanning stock-price forecasting, disease classification, and geospatial clustering. As a Data Analyst intern, redesigned a manual workflow into an automated pipeline that cut processing time from 1–2 days to about 10 minutes.

EDUCATION

Universitas Gadjah Mada - Yogyakarta, Indonesia

Aug 2022 – May 2026

- Bachelor of Statistics, GPA: 3.57/4.00 (Cum Laude)

TECHNICAL SKILLS

Programming & Databases: SQL (MySQL), Python (pandas, NumPy, scikit-learn, PyTorch, CatBoost), R

Visualization & BI: Tableau, Power BI, Streamlit

Productivity: Microsoft Excel, Word, PowerPoint

INTERNSHIP EXPERIENCE

PT Federal International Finance – Data Analyst Intern, Asset Management Department

Feb – Jul 2026

- Redesigned the vehicle-service data collection process by replacing manual review of receipt photos with a self-service driver input form, eliminating manual data entry and freeing the team to focus on analysis.
- Rebuilt the Excel workbook with automated formulas, cutting processing time from 1–2 days to about 10 minutes and improving data consistency.
- Conducted physical and system-based stock-take (stock opname) across 10,000+ assets, verifying and reconciling records against the master inventory to identify discrepancies.

ACADEMIC PROJECTS

Stock Price Forecasting with a Hybrid ICEEMDAN-SVD-LSTM Model — Published, SINTA 4 Journal

Jul 2026

- Developed an end-to-end pipeline (ICEEMDAN decomposition, SVD denoising, LSTM training) to forecast daily prices for three Indonesian stocks (BBRI, UNVR, UNTR).
- Benchmarked against a standalone LSTM and simpler baselines; the hybrid model reduced RMSE by 64–86% and kept MAPE under 1% across all three stocks.

SQL Revenue Analysis — Chinook Digital Music Store Database

Jun 2026

- Analyzed digital music store revenue using SQL CTEs, window functions, and multi-table joins across transaction, customer, track, genre, and artist data.
- Identified genre as the strongest revenue driver, with the top 4 genres contributing ~73.5% of revenue, supporting product-mix-focused recommendations.

Education Facility Clustering Analysis – Demak Regency

Jan 2025

- Conducted geospatial clustering of 14 districts across 8 educational-facility variables using K-Means and K-Medoids, identifying 4 optimal clusters (Silhouette Score: 0.57).
- Built interactive and static geospatial visualizations using Python (GeoPandas, Folium, Matplotlib).

Interactive Disease Prediction Application

May 2025

- Engineered a multi-class disease-prediction application using CatBoost to classify likely diagnoses from symptom-based inputs.
- Designed an adaptive consultation workflow in Streamlit, incorporating follow-up symptom selection, cross-validation, and interpretable result outputs.

ACADEMIC EXPERIENCE

Teaching Assistant – Introduction to Time Series

Sep – Dec 2025

- Assisted students in time series analysis using R and Eviews.

Teaching Assistant – Biostatistics and Epidemiology

Sep – Dec 2025

- Supervised practicum sessions and assisted with data analysis using R and SPSS.

ORGANIZATIONAL EXPERIENCE

Expert Staff, Media and Information Statistics Division, Himasta FMIPA UGM

Feb 2023 – Feb 2024

- Produced consistent visual content for the Media & Information Statistics Division's Instagram feed to strengthen organizational branding.
- Streamlined coordination between division members and content timelines, improving publishing efficiency.

Pekan Statistika 2023 – Project Lead

Mar – Sep 2023

- Fully responsible for the execution of Pekan Statistika 2023 committee work.
- Coordinated the full series of events from planning through execution.
